5. Title of proposed action: Bright Mine Project, M/021/030 – Neil Bradshaw	
6. Description: During Operations: As quarries are mined out, these areas will be partially backfilled with any reject raw quarried rock together with unmarketable surplus processed material. After Operations: Quarry areas will be partially backfilled with both waste rock and surplus/unmarketable material process fines, placement of fines on pit floors, replacement of salvaged topsoil on screened fines and broadcast seeding. Quarry highwalls will be reduced to 45 degrees or less either by cutting back the wall or backfilling against the highwall with waste. Reclamation of processing areas will consist of regrading to conform to the approximate original contours. After the salvaged topsoil is respread, composted manure will be applied, followed by ripping the surface 18" to 24" deep and broadcast seeding with an approved seedmix suited to the postmining land use.
